

# | CAN TO CAN

- User Interface (UI) Design: Ensuring the website has a beautiful, easy-to-use design that reflects the sustainable and green spirit of Can to Can.
- User Experience (UX) : Creating an optimal user experience, making it easy for users to access project information and participate in recycling activities.

# Can to Can

Aluminium can recycling project.  
Aluminium is one of the most recycled and most recyclable materials today.  
Can to Can recycling is a demonstration of a circular economy.

## About Can to Can

At the heart of the Can to Can Project lies a vision for a greener and more sustainable tomorrow. We are dedicated to collecting and recycling used beverage cans (UBC), giving them a fresh lease on life as brand-new cans. Our commitment to environmental preservation and circular economy principles drives us to partner with like-minded organizations and individuals who share our vision.

### Our Mission

Our mission is crystal clear: to collect the used aluminum cans (UBC). The majority of this collection will take place in familiar and convenient locations such as restaurants, hotels, and shopping malls, thanks to the dedication of our enthusiastic partners.

### Impact Highlights

Can to Can Project is poised to create a significant impact in several critical areas:

- Rates:** Elevating can recycling rates in Vietnam, compared to virgin aluminum production.

## "Can to Can" Recycling Program Achievement

Number of recycled aluminum cans

1,869

Reduction of CO2 emission

6,637,892 kg CO2

Energy save from recycling

332,122,567 kWh

Number of days it takes to recycle used beverage

27 days

## It Starts From

SORTING

BAILING UP

After the website officially launched, Can to Can achieved notable results in terms of quality and value:

- The website's interface was beautifully designed and easy to use, helping users easily access information and participate in recycling programs.
- Helped increase brand awareness of Can to Can, enhancing its image and trust from the community and partners.
- The website supports Can to Can in implementing its communication strategy, attracting and engaging partners and users through features like blogs, notifications, and environmental protection campaigns.
